

# Tract Index

39-1C

A spectrogram visualization showing a series of vertical black lines of varying heights against a white background. These lines are evenly spaced horizontally across the frame, suggesting a periodic signal or a series of discrete events. The heights of the lines vary, creating a visual representation of amplitude or intensity over time.

A horizontal line with vertical tick marks at regular intervals, representing a scale or a timeline.

A horizontal line consisting of 20 evenly spaced vertical tick marks. The first tick mark is at the far left, and the last tick mark is at the far right. The ticks are thin black lines.
